

AMCOM G-8 RESOURCE MANAGEMENT

MISSION: AMCOM G-8 will deliver defensible and sustainable resourcing solutions that enable aviation and missile readiness for the Army while achieving exceptional stewardship and auditable outcomes.

The U.S. Army Aviation and Missile Command G-8 develops and executes resource management solutions which enables the sustainment and readiness of the Army's aviation and missile systems. To accomplish this, AMCOM G-8 manages the command's total resource portfolio consisting of approximately \$4.6 billion of appropriated, reimbursable and Army Working Capital Funds (AWCF) and 7,824 manpower authorizations.

AMCOM G-8's strength lies in the talent, experience and dedication of its employees. AMCOM G-8 encourages innovative thinking, daring ideas, and bold solutions to maximize the efficient use of the command's resources. Experts in many diverse disciplines, AMCOM G-8 financial, cost analysis and force management professionals work cooperatively as an integrated team to support the Soldier by enabling aviation, missile, and calibration materiel readiness for the U.S. Army.

The G-8 is organized into six divisions:

- Accounting
- Cost Analysis
- Manpower & Operations
- Comptroller
- Army Working Capital Fund Management
- Resource & Acquisition Support

Mission Essential Functions:

- Plan, program, budget and execute financial and manpower resources that fully enable the Command's missions.
- Develop, interpret and ensure compliance with applicable acquisition, fiscal, accounting and manpower laws, regulations and policies.
- Lead the Command's Audit Readiness efforts to ensure all systems and processes are fully auditable in accordance with Congressional, Defense, and Army guidance.
- Manage the current and future manpower resources to maximize the efficiency and effectiveness of the Command's workforce.
- Provide accurate and timely cost analysis in support of numerous major weapon system acquisition programs.
